SUBJECT: Water to Be Restored to Piedmont Residents

BY: Daniel Fanning, Community Relations Officer

Water to Be Restored to Piedmont Residents Today

A water main break in the Piedmont Heights area on Tuesday has caused some residents to be without water for the past two days and nights. City crews have been working around the clock, through dangerously cold temperatures to locate and repair the break. As of early this morning, crews pinpointed the cause of the leak and are now completing repairs. Water should be restored to all residents in the Piedmont neighborhood by midday today. We appreciate the public's patience and understanding during this inconvenience.

If you have any questions or would like additional information please contact Eric Shaffer, Chief Utilities Engineer, at (218) 730-5072 or Daniel Fanning, Community Relations Officer, at (218) 730-5307.
