SUBJECT: Residents and businesses in Duluth Heights/Mall area experiencing low water pressure

BY: Pakou Ly, Public Information Coordinator

Residents and businesses in Duluth Heights/Mall area experiencing low water pressure

[Duluth, MN] - The City of Duluth is notifying residents and businesses in the Duluth Heights, Piedmont Heights, Miller Hill Mall and Airpark areas that they will experience low water pressure today. This low water pressure was caused by a computer malfunction which prevented normal operations of the water pumps. At this time, the technical problems have been fixed and the water pumps are fully functional. Due to the large area impacted, the system will require time to build up normal water pressure.
