SUBJECT: UPDATE: Water Main Break Effects Many Piedmont Residents

BY: Daniel Fanning, Community Relations Officer

UPDATE: City crews have determined that water will likely NOT be restored by tomorrow morning. Residents should plan accordingly. Anyone in the affected Piedmont neighborhood needing water can go their local fire hall to get water for use at their homes while the break is being repaired. Residents should bring their own containers to fill with water.

Water Main Break Effects Many Piedmont Residents

A water main break in the Piedmont Heights area has affected the water supply to a large number of residents. City crews will be working into the night to locate and repair the break. The areas affected are Adirondack Street, Allegheny Street, Appalachian Avenue, Catskill Street, Gearhart Street, Hillcrest Drive, Hutchinson Road, lower Ozark Street, Piedmont Avenue, Selkirk Avenue, Springvale Road, and Tyrol Street.

Residents needing water can go to the Cottonwood, Maple Grove or 27th Avenue West and Superior Street Fire Halls to get water for use at their home while the break is being repaired.

We ask that residents bring **THEIR OWN** containers to fill with water.

We appreciate the public's patience while we work to restore water to the Piedmont neighborhood.
