Addendum #1  
Bid # 20-6601  
ISD709 Video Security Equipment

This addendum serves to notify all bidders of the following changes to the solicitation documents:

1. There is an incorrect part number listed for the Rack Servers. The correct Panasonic part number is NVR-R-2-140TB-V2.

2. Any proposed product substitutions (requests for approved equal) must include and fully support Panasonic's Video Insight Management software licenses.

3. Specifications for the Panasonic NVR tower and rack servers are attached.

4. Question received – “You have 84 hard drives requested, but you only have 4 rack servers requested. Each rack server already has 8 drives so you would have extra that can’t be used. How is this being configured?”

   Answer – These drives will be used to replace/upgrade hard drives in 16 existing Panasonic NVR systems. The 16 licenses requested as item b are needed to allow Panasonic Video Insight to be used with our 16 existing Panasonic NVR systems.

Please acknowledge receipt of this Addendum by initialing and dating Addendum #1 below the bid form on the invitation for bids.
