

Get moving for a healthier heart

According to the American Heart Association, cardiovascular disease is the leading cause of death in the United States. Your heart is the hardest working muscle in your body. So it's critical to take good care of it to maintain overall health. Getting regular physical activity — like walking and yoga — is a great way to work on strengthening your heart. Especially when combined with a healthy diet, exercise is a powerful method to protect your heart and help you live longer. Medica has several resources to help motivate you to get moving during American Heart Month and beyond.

Ovia Health

Free heart health webinar: February 13, 2024 at 12 pm CST

Join Ovia's care experts for an in-depth discussion about women's unique risk factors that may play a bigger role in the development of heart disease.
