March 22, 2022

Dear Resident,

Re: 2022 Street Preservation Project, City Project No. 1694

This letter is to notify you of the public meeting for the 2022 Street Preservation Project that will occur this year (please see the enclosed list of streets). There will be two virtual informational sessions and to participate, the virtual meetings weblink can be found here:

2022 Duluth Street Projects - Public Informational Sessions:

Wednesday April 6, 2022

Noon – 1pm OR 6pm-7pm

How to reach the virtual meeting:

1. Link to <https://duluthmn.gov/live-meeting/>
2. Click on “Planning & Development Public Meetings”
3. Click on “2022 Duluth Street Projects Public Info Session”

If you cannot attend the meetings or would like to review, you can find more info, including maps of the projects and the meeting recordings under “Current Sales Tax Street Projects” tab here: <https://duluthmn.gov/engineering/>

The proposed project will involve one of the following on each street (see List of Streets in treatment column):

- Bituminous overlay – paving 2 inches on top of existing pavement.
- Reclamation and paving – (1) Milling 2-3 inches of bituminous off street. (2) Reclaim the street which involves grinding up remaining pavement and 2-3 inches of subgrade (gravel) and then, (3) paving 3-4 inches of new pavement.
- Mill and overlay – Milling 1.5-2 inches of paving off street and paving a new 1.5-2 inches layer of paving.

In addition, there will be some storm repairs as well as ADA upgrades (all streets), mostly at intersections. The project should be able to maintain local access to homes and businesses; if not, temporary detours will be set up. Some residential and business driveways will require concrete work and notice will be given to individual residents when access will be limited. The project should not affect mail delivery or garbage pickup.

The City of Duluth’s Streets Sales tax will fund the project and there will be no assessments for the project to property owners.

I encourage you to contact me at ploomis@duluthmn.gov or 218-730-5094 if you have questions.

Regards,

Patrick Loomis, PE
Project Engineer, City of Duluth

James Gittemeier, AICP
Senior Transportation Planner, City of Duluth

CC: City Councilors
