

Stream Recovery - East Group

Stream Recovery - East Group									
Site Information					EWP \$		Costs		
ID	Stream	Reach	Sites within reach	Description	EWP applied for?	EWP received?	Cost to stabilize ENTIRE reach	Construction (severe sites only)	Cost to stabilize ONLY the most severe sites within the reach
DUL-001	Chester	582e	582e.1	Stabilization needed at locations of very severe bank erosion to protect homes and FEMA funded repairs public hiking trails. Volunteer work has also been utilized heavily in this area and these restoration efforts should be protected. There are three severely eroding banks adjacent to eachother in this location. All three banks threaten homes and popular hiking trails, and to minimize mobilization costs all three should be done as a single project.	No	N/A	\$143,000	\$109,000	\$143,000
DUL-003	Chester	582d	582d.1	Bank stabilization needed to protect toe of road slope embankment of FEMA funded repairs of Chester Park Drive and prevent future damage to popular public hiking trail.	No	N/A	\$53,000	\$40,000	\$53,000
DUL-004	Amity	579b	579b.1	Bank stabilization needed to prevent toe slope cutting of road embankment to protect FEMA funded realignment of Seven Bridges Road. Bank erosion and undercutting has destabilized the roadway.	No	N/A	\$87,000	\$66,000	\$87,000
DUL-005	Chester	582k	582k.1	Bank stabilization urgently needed along to protect access road embankment and water quality. To minimize mobilization costs these three eroded sections of the same streambank adjacent to eachother should be stabilized at the same time.	No	N/A	\$221,000	\$168,000	\$221,000
DUL-007	Miller	590d	590d.1	Stabilization of three severely eroded areas adjacent to eachother to protect parking lot, trails, WLSSD sewer line. This area also has a disc golf course and receives heavy foot traffic. Stabilization needed immediately to ensure that slope does not continue to erode and undermine the large sanitary sewer interceptor.	No	N/A	\$70,000	\$53,000	\$70,000
DUL-009	Coffee	584c	584c.1	Stabilization and restoration to protect public safety from steep exposed banks on a busy public golf course, additionally providing immediate benefit to fish and wildlife. Stabilization would ensure protection and longevity of FEMA-funded culvert and paved cart trail replacement immediately downstream.	No	N/A	\$401,000	\$131,000	\$173,000
DUL-012	Amity	579d	579d.1	Bank stabilization needed at a severely eroding bank that is threatening the road embankment and encroaching on Seven Bridges Road.	No	N/A	\$728,000	\$163,000	\$215,000

MN DNR	Miller			Lower Miller Creek below 26th Ave W - debris and construction materials. Lower Lincoln Park above 3rd Street - rock and sediment.	No	N/A				\$70,000	
									\$1,703,000	\$730,000	\$1,032,000
