SAFETY REQUIREMENTS

1. The construction of the Sky Harbor Airport Vertical Pivot Gate and Fence project shall be in full conformance with all applicable federal, state, and local regulations and codes. All personnel involved in the construction shall wear appropriate safety equipment, such as hard hats, safety glasses, and reflective vests.

2. Properly train and direct all personnel involved in the construction to ensure a safe working environment. All necessary safety equipment and procedures shall be provided.

3. The construction shall comply with all applicable safety standards and procedures, including the use of personal protective equipment, safe work practices, and the control of hazardous materials.

4. The construction shall be performed in a manner that minimizes the risk of injury or damage to property.

5. The construction shall be performed in accordance with the approved plans and specifications.

6. The construction shall be performed in a manner that does not interfere with the operation of the airport or any other airport operations.

7. The construction shall be performed in a manner that does not cause any significant disruption to the airport or any other airport operations.

8. The construction shall be performed in a manner that does not cause any significant damage or hazard to the airport or any other airport operations.

9. The construction shall be performed in a manner that does not cause any significant environmental impact.

10. The construction shall be performed in a manner that complies with all applicable environmental regulations.

11. The construction shall be performed in a manner that does not cause any significant disruption to the surrounding community.

12. The construction shall be performed in a manner that does not cause any significant damage to the surrounding community.

13. The construction shall be performed in a manner that complies with all applicable regulations.

14. The construction shall be performed in a manner that complies with all applicable codes.

15. The construction shall be performed in a manner that complies with all applicable standards.

16. The construction shall be performed in a manner that complies with all applicable guidelines.

17. The construction shall be performed in a manner that complies with all applicable best practices.

18. The construction shall be performed in a manner that complies with all applicable standards.

19. The construction shall be performed in a manner that complies with all applicable guidelines.

20. The construction shall be performed in a manner that complies with all applicable best practices.

21. The construction shall be performed in a manner that complies with all applicable standards.

22. The construction shall be performed in a manner that complies with all applicable guidelines.

23. The construction shall be performed in a manner that complies with all applicable best practices.

24. The construction shall be performed in a manner that complies with all applicable standards.

25. The construction shall be performed in a manner that complies with all applicable guidelines.

26. The construction shall be performed in a manner that complies with all applicable best practices.

27. The construction shall be performed in a manner that complies with all applicable standards.

28. The construction shall be performed in a manner that complies with all applicable guidelines.

29. The construction shall be performed in a manner that complies with all applicable best practices.

30. The construction shall be performed in a manner that complies with all applicable standards.

31. The construction shall be performed in a manner that complies with all applicable guidelines.

32. The construction shall be performed in a manner that complies with all applicable best practices.

33. The construction shall be performed in a manner that complies with all applicable standards.

34. The construction shall be performed in a manner that complies with all applicable guidelines.

35. The construction shall be performed in a manner that complies with all applicable best practices.

36. The construction shall be performed in a manner that complies with all applicable standards.

37. The construction shall be performed in a manner that complies with all applicable guidelines.

38. The construction shall be performed in a manner that complies with all applicable best practices.

39. The construction shall be performed in a manner that complies with all applicable standards.

40. The construction shall be performed in a manner that complies with all applicable guidelines.

41. The construction shall be performed in a manner that complies with all applicable best practices.

42. The construction shall be performed in a manner that complies with all applicable standards.

43. The construction shall be performed in a manner that complies with all applicable guidelines.

44. The construction shall be performed in a manner that complies with all applicable best practices.

45. The construction shall be performed in a manner that complies with all applicable standards.
