PROPOSAL PACKAGE

Rehabilitation and Reline of Brewery Creek Storm Sewer Sections 29 & 31

City of Duluth, Minnesota
City Hall
411 West 1st Street
Duluth, MN  55802

City Project # 0036ST

Bid # 2015-527

Opening Date: September 2, 2015
Time: 2:00 PM
Place (Submit Bids): Room 100, City Hall
SPECIAL PROVISIONS
City Job Number: 0036ST
Brewery Creek Storm Sewer Rehabilitation
August 6, 2015

CERTIFICATION

I HEREBY CERTIFY THAT THIS plan, SPECIFICATION or report
was prepared by me or under my direct supervision and that I am a duly
Licensed Professional Engineer under the laws of the State of Minnesota.

Request for Bids form
The following forms and regulations/rules/statutes and interpretations, which are incorporated by reference in this contract, are available on the World Wide Web at the sites listed below. The City of Duluth will use its best efforts to ensure that the most recent, applicable forms and regulations/rules/statutes and interpretations are included on the web sites provided; however, if you are the successful bidder, prior to signing the contract, you are responsible for comparing the versions of the forms and regulations/rules/statutes and interpretations attached to the contract which you are signing with the versions on the web to ensure conformity. Hard copies of all forms are available at the Engineering Division.

**THE VERSIONS OF THE FORMS AND REGULATIONS/RULES/STATUTES AND INTERPRETATION ATTACHED TO THE CONTRACT WILL BE CONTROLLING.**

NOTICE TO ALL BIDDERS
The 2015 Edition of the City of Duluth Public Works & Utilities Department/Engineering Division “Construction Standards” book and any addendums or supplements is incorporated by reference and is deemed to be a part hereof as if fully incorporated and set forth herein. The ‘Construction Standards’ is available on the City website at: http://www.duluthmn.gov/engineering/standard-construction-specifications/.

SCOPE OF WORK
This project consists of rehabilitation of the existing Brewery Creek Storm Sewer by means of lining. Lining may be accomplished by spirally winding and continuously welding a single strip of HDPE liner of the specified diameter into the RCP host pipe or by slip lining HDPE pipe of the specified diameter into the RCP host pipe. The project also includes traffic control, excavation, embankment and restoration of facilities and surfacing.

CONTACT INFORMATION
Questions regarding this project should be directed to: Tom Johnson, City Project Engineer (Ph. 218-730-5103).

RESPONSIBLE CONTRACTOR VERIFICATION AND CERTIFICATION OF COMPLIANCE
A reminder to potential bidders that the Responsible Contractor Verification and Certification of Compliance is required by Minnesota Statute to be submitted with your Bid Proposal. Refer to sections 5-14 and 1801 of the City’s “Construction Standards” and the bid documents.

(1404) MAINTENANCE OF TRAFFIC CONTROL AND (2563) TRAFFIC CONTROL
The following is added to the provisions of MnDOT 1404 and 2563:

The Contractor will only be permitted to close Skyline Parkway through the project site between the hours of 8am and 4pm and will only be permitted to do so for a maximum of 3 days. At all other times the roadway shall be maintained open to through traffic. Interim (short term) traffic control as required to facilitate construction operations shall be considered to be included for payment under the lump sum traffic control item.

Unless otherwise indicated, access to businesses and residences shall be maintained at all times. Maintenance of the roadway, drives and entrances shall be considered incidental.
SPECIAL PROVISIONS
City Job Number: 0036ST
Brewery Creek Storm Sewer Rehabilitation
August 6, 2015

No separate measurement or payment shall be made for any of the various elements comprising traffic control on the project but all such work shall be considered included for payment under the lump sum traffic control item.

SP-6

(1504) COORDINATION OF CONTRACT DOCUMENTS

The first paragraph of MN/DOT 1504 is deleted and replaced with the following:

A requirement appearing in one of the Contract documents is as binding as though the requirement appears in all. If discrepancies exist between the Contract documents, the following order of precedence applies:

(1) Addenda,
(2) Special Provisions,
(3) Project-Specific Plan Sheets,
(4) City of Duluth Standard Construction Details,
(5) City of Duluth Standard Construction Specifications,
(6) MN/DOT Supplemental Specifications,
(7) MN/DOT Standard Plan Sheets and Standard Plates,
(8) MN/DOT Standard Specifications.

SP-7

(1505) COOPERATION BY CONTRACTORS

Contractor is hereby notified that other work by other contractors may be occurring during the specified contract time. Work by others in the vicinity of this contract will consist of sidewalk, stoop construction and other ADA compliance/surfacing work. Contractor shall cooperate and stage work as necessary to prevent damage to newly placed work by others and shall coordinate appropriately with other contractors.

SP-8

(1507) UTILITY PROPERTY AND SERVICE

Known utilities in the vicinity of the project include:

Minnesota Power (Electric Power)
Century Link (Telephone)
City of Duluth (Sanitary Sewer)
City of Duluth (Water & Gas)

Contractor shall perform construction operations near utility properties in accordance with the provisions of MnDOT 1507, except as modified below:

Add the following to MnDOT 1507.2: (3) The Contractor shall acquire a Positive Response confirmation from MnDOT for all proposed excavations when the Gopher State One Call has indicated that proposed excavations may affect MnDOT utilities. The Contractor may call MnDOT Electrical Services Section (ESS) Dispatch Locating to
confirm the status of MnDOT owned Utility infrastructure. Contractor can contact 
MnDOT Electrical Services Section (ESS) Dispatch Locating at (651) 366-5750 or (651) 
366-5751. The Contractor shall be responsible for all damage to MnDOT owned 
Utility infrastructure if the Contractor did not acquire a Positive Response 
confirmation from MnDOT.

Any work performed by the Contractor that does not comply with MnDOT 1507.2 
may be considered Unauthorized Work in accordance with MnDOT 1512.2.

All utilities related to this Project are classified as "Level D," unless the Plans 
specifically state otherwise. This utility quality level was determined according to the 
guidelines of CI/ASCE 38-02, entitled "Standard Guidelines for the Collection and 
Depiction of Existing Subsurface Utility Data."

The bidder agrees that it shall use the Plan to identify the location of MnDOT storm 
water drainage facilities in order to meet the requirements of Minnesota Statutes Ch. 
216D and Minnesota Rules 7560.0250 which apply to MnDOT storm water drainage 
facilities.

SP-9  
(1508) CONSTRUCTION STAKES, LINES AND GRADES
The provisions of Mn/DOT 1508 are hereby modified and supplemented as follows:

The following is added to the first paragraph of Mn/DOT 1508:

The Engineer will assist the Contractor in the identification of the Project Control 
Points as listed in the Plan. The Contractor shall be responsible for providing all 
surveying, staking and layout as required to properly construct the work. Contractor 
 surveying shall include, but not be limited to, all staking and layout required to 
establish construction limits, subcut and finish grade elevations and slope tie in 
points in accordance with the Plans.

The Contractor shall also be solely responsible for producing adequate survey of the 
inside of the existing sewer to verify that his proposed lining system will 
accommodate the irregularities and deformities in the existing pipe. Refer to SP-16 
“Remove Existing Floor” for additional information and requirements.

All labor, equipment and material required to provide Contractor survey shall be 
considered incidental.

SP-10  
(1702) PERMITS, LICENSES, AND TAXES
Permits obtained or pending for this project include:
• City of Duluth Erosion & Sediment Control Permit, available online. The permit fee will be waived. A copy of the permit is attached in Appendix A of the special provisions.

SP-11  SUBLETTING OF CONTRACT
The provisions of the City of Duluth, Minnesota Construction Standards shall be modified as follows:

The bid item/work: LINING SEWER PIPE 60” and LINING SEWER PIPE 63” will be considered “Specialty Items”.

SP-12  DISCOVERY OF CONTAMINATED MATERIALS AND REGULATED WASTE
If during the course of the Project, the Contractor unexpectedly encounters any of the following conditions indicating the possible presence of contaminated soil, contaminated water, or regulated waste, the Contractor shall immediately stop work in the vicinity, notify the Engineer, and request suspension of work in the vicinity of the discovery area, in accordance with MnDOT 1803.4.

A documented inspection and evaluation will be conducted prior to the resumption of work. The Contractor shall not resume work in the suspected area without authorization by the Engineer.

(A) Indicators of contaminated soil, ground water or surface water include, but are not limited to the following:

(1) Odor including gasoline, diesel, creosote (odor of railroad ties), mothballs, or other chemical odor.
(2) Soil stained green or black (but not because of organic content), or with a dark, oily appearance, or any unusual soil color or texture.
(3) A rainbow color (sheen) on surface water or soil.

(B) Indicators of regulated wastes include, but are not limited to the following:

(1) Cans, bottles, glass, scrap metal, wood (indicators of solid waste and a possible dump)
(2) Concrete and asphalt rubble (indicators of demolition waste).
(3) Roofing materials, shingles, siding, vermiculite, floor tiles, transite or any fibrous material (indicators of demolition waste that could contain asbestos, lead or other chemicals).
(4) Culverts or other pipes with tar-like coating, insulation or transite (indicators of asbestos).
(5) Ash (ash from burning of regulated materials may contain lead, asbestos or other chemicals).
(6) Sandblast residue (could contain lead).
(7) Treated wood including, but not limited to products referred to as green treat, brown treat and creosote (treated wood disposal is regulated).
(8) Chemical containers such as storage tanks, drums, filters and other containers (possible sources of chemical contaminants).
(9) Old basements with intact floor tiles or insulation (could contain asbestos), sumps (could contain chemical waste), waste traps (could contain oily wastes) and cesspools (could contain chemical or oily wastes).

MnDOT 1717.2 A2 is hereby deleted and replaced with the following:

A2 During Construction

The Contractor shall schedule and install temporary and permanent sediment and erosion control measures, construct ponds and drainage facilities, finish earth work operations, place topsoil, establish turf, and conduct other Contract work in a timely manner to minimize erosion and sedimentation.

All exposed soil areas with continuous positive slopes that are within 60 m (200 feet) of a public water shall have temporary or permanent erosion protection within 24 hours after the construction activity in that portion of the site has temporarily or permanently ceased and connection is established to the public water. All other positive slopes to constructed surface waters, such as permanent storm water treatment ponds, curb and gutter systems, storm sewer inlets, temporary or permanent drainage ditches, or other storm water conveyance systems, shall have temporary erosion protection or permanent cover for the exposed soil areas as soon as practicable but no later than 14 days after construction activity has temporarily or permanently ceased in that area. For those drainage areas that have a discharge point within 1 mile and flows to an impaired or Special Waters shall have temporary erosion protection or permanent cover for the exposed soil areas as soon as practicable but no later than 7 days after construction activity has temporarily or permanently ceased in that area. Impaired and Special Waters are defined as those listed and referenced in the NPDES Permit.

Positive slopes adjacent to public waters and wetlands will be stabilized at the close of each day when weather forecasts for rain that evening, and/or overnight including weekends. Once work is completed it will be stabilized permanently as soon as practical but no later than seven days.
Exposed soil areas do not include; stockpiles or surcharge areas of sand, gravel, aggregate, concrete, bituminous, or road bed and surfacing material. A perimeter sediment barrier may be necessary to minimize loss when these are within the 60 m (200 feet) of existing surface waters or the property edge.

The bottom of temporary or permanent drainage ditches or swales constructed to drain water from a construction site must be stabilized with erosion control measures for the last 60 m (200 feet), or more when conditions warrant, from the property edge or from the point of discharge to any existing surface water. Stabilization shall be completed within 24 hours after the construction activity in that portion of the ditch has temporarily or permanently ceased. Ditch stabilization will continue concurrently with construction activities but no later than 14 days after construction activities have permanently or temporarily ceased. Any, culvert pipe or storm sewer pipe that is within the cumulative distance is not part of this distance. Ditch checks may be provided where necessary to slow water flow and capture sediment.

Temporary or permanent ditches used as treatment systems will not need to be stabilized but must provide the proper Best Management Practices for the treatment system.

Pipe outlets shall be provided with temporary or permanent energy dissipation within 24 hours of connecting the pipe to any constructed or existing surface waters.

The Contractor shall limit the surface area of erodible soil that can be exposed to possible erosion at any one time when the permanent erosion control features are not completed and operative.

All liquid and solid wastes generated by concrete washout operations must be contained and not have the opportunity to come in contact with the surface waters or ground water. This includes the ditches, slopes to ditches, curb and gutter/storm sewer systems, and ponds. Areas where there are sandy soils, karsts, and high ground water the washout facility must have an impermeable liner. Liquid and solid wastes must be disposed of properly. A concrete washout sign must be installed adjacent to each washout facility to notify personnel.

SP-13 (1803) LIMITATION OF OPERATIONS
The work shall be performed in accordance with the provisions of MN/DOT 1803 and the following:

The Contractor shall be mindful that the work is planned to occur within the operational footprint of an active business (UDAC). Care and consideration shall be given to minimize disruption to the business. Access to the business shall be maintained at all times.
The sequence of the work shall be restricted such that all work at Phase A location (as identified in the Plans) shall be complete, prior to erecting any traffic control or beginning any work that will disrupt parking or traffic flow at Phase B location.

SP-14 (1806) DETERMINATION AND EXTENSION OF CONTRACT TIME

The Contract Time will be determined in accordance with the provisions of MN/DOT 1806 and the following:

1. **Construction operations shall be started on or before September 30, 2015 or within ten (10) calendar days after the date of Notice to Proceed, whichever is later.**

2. **Substantial Completion.** All work under this Contract shall be substantially complete on or before December 15, 2015. For this project, Substantial Completion shall be deemed to include ALL work in the Contract except final turf establishment.

3. **Final Completion.** ALL work required under this Contract shall be complete on or before June 20, 2016.

4. The third exemption listed under the second paragraph of the provisions of MN/DOT 1806.3 is modified to the extent that the phrase “(3) During the inclusive period from November 15 through April 15, except as specified in 1806.1...” is deleted.

5. No work which will restrict or interfere with traffic shall be performed between 12:00 noon on the day preceding and 6:30 a.m. on the day following any consecutive combination of a Saturday, Sunday, and legal holiday without written permission from the Engineer.

   (A) If the Contractor chooses not to work at all on the day preceding the holiday period, no working day charges will be assessed.

   (B) If the Contractor chooses to work prior to 12:00 noon on the day preceding the holiday period or if the Contractor obtains written permission to work after 12:00 noon on the day preceding the holiday period, working day charges will be assessed only for the actual hours worked.

6. When all, or a portion, of the Contract Time is specified as a calendar completion date, the time is presumed to have been determined by considering the Proposal quantities, normal weather for the locality and season of the year, and the necessity of having the work completed by the specified date. The time may be extended by the Engineer only if the delay is considered “Excusable” in accordance with MN/DOT 1806.2 Types of Delays.
(1807) FAILURE TO COMPLETE WORK ON TIME
The provisions of MN/DOT 1807 shall apply in full to both the Substantial Completion Date and the Final Completion Date.

(2104) REMOVE CONCRETE FLOOR
The provisions of MN/DOT 2104 shall apply on this project as supplemented and/or modified by the following:

This work shall include inspection and reconnaissance to be performed by the Contractor in sufficient detail to identify and delineate required removal areas in the cast in place concrete invert (floor) of the existing RCP to permit lining of the specified inside diameter with the necessary allowance given for wall thickness of liner and grouting of annular spaces. This work shall also include removal of precast concrete along other areas of the existing pipe where deemed necessary by the Engineer due to deformation or deterioration.

Prior to planned removal work, Contractor shall pull a template through the existing pipe to be relined that approximates the actual liner cross section in order to identify areas that require removal to accommodate the liner. These removal areas shall be marked and approved by the Engineer prior to beginning any removal. Make a near vertical edge with removal equipment along removal limits. No saw cutting of removal limits will be required.

Measurement shall be made by the square foot and shall include all costs associated with inspection, examination of condition, delineation of required removal areas, removing concrete and disposing of removed material outside of the sewer at an approved off-site disposal site.

(2105) SELECT GRANULAR BORROW MOD. 7%
The provisions of MN/DOT 2105 and 2451 shall apply on this project as supplemented and/or modified by the following:

Select granular materials shall be carefully placed adjacent to the structure to reduce potential damage to the structure or the joint waterproofing system.

Compaction of the Select Granular Borrow Mod 7% material shall be accomplished by the Specified Density Method. Material located greater than 3 feet below top of subgrade elevation shall be compacted to not less than 95% of maximum density. Material above this location shall be compacted to not less than 100% of maximum density.

Maximum particle size shall not exceed 3". 
SPECIAL PROVISIONS
City Job Number: 0036ST
Brewery Creek Storm Sewer Rehabilitation
August 6, 2015

SP-18 (2105) DEWATERING
The provisions of MnDOT 2105 AND 2451 shall apply on this project and the following:

Dewatering shall be compensated as a Lump Sum payment and include all necessary pumping, sediment basins and other means necessary to facilitate construction of all portions of the project in the dry (some incidental flow may be permitted during the pipe lining process as an aid to installation). Discharged water shall pass through a sediment trap and must meet the requirements of the MPCA, DNR and NPDES permits before it returns to the stream.

SP-19 (2105) TEMPORARY STREAM DIVERSION
The provisions of MnDOT 2105 AND 2451 shall apply on this project and the following:

The Temporary Stream Diversion System shall be constructed in accordance with the applicable details as shown in this section and the following:

This work shall consist of construction of a Temporary Stream Diversion System to facilitate construction and/or repair of the structure(s) in the dry.

The Contractor shall submit a site plan for the Temporary Stream Diversion System to the Engineer for approval a minimum of 5 days prior to starting construction.

Preparation of the site plan, maintenance of the Temporary Stream Diversion System, and any repairs or modifications made necessary by inadequate design or unexpected rainfall events shall be considered incidental.

The Contractor’s stream diversion method shall comply with all laws, requirements, and approvals applicable to the project.

Stream flow shall be maintained at all times. At no time shall the stream flow be interrupted or dammed unless approved by the Engineer.

The stream diversion system shall be sized to adequately convey a 2-year, 24-hour rainfall event. Contractor shall be responsible for determining the 2 year, 24-hour event.

Site dewatering to facilitate construction shall not satisfy the Temporary Stream Diversion System requirements.

Temporary Stream Diversion Systems will be required for the structure(s) as indicated on the Plans.
Payment will be made under item 2105.602 Temporary Stream Diversion System at the Contract unit price per each and shall be compensation in full for all labor, equipment, and materials required for installation, maintenance, and removal of the temporary system. No payment and a $1,000 per day penalty shall be made in the event that the requirements above are not satisfied. In the event that the Engineer and Contractor determine that a Temporary Stream Diversion System is not necessary and it is not constructed, no payment shall be made for Item Temporary Stream Diversion System.
SP-20  (2211) AGGREGATE BASE (CV) CLASS 5
The provisions of MN/DOT 2211 and 2451 shall apply on this project as supplemented and/or modified by the following:

Compaction of Aggregate Base (CV) Class 5 shall be accomplished by the Specified Density Method to 100% of maximum density.

SP-21  (2301) PRESSURE GROUTING
The provisions of Mn/DOT 2301, 2433 and 2401 shall apply and are modified / supplemented as follows:

INTRODUCTION
Pressure grouting involves the injection under high pressure of a mortar-like grout to fill subsurface voids.

The intent of the pressure grouting specified herein is to provide soil improvement and fill the existing void behind the existing RCP near the intersection of Section 29 and Section 30 of the Brewery Creek Storm Sewer. This work does not include grouting of annular space between existing RCP and new liners.

REFERENCES
A. Reference documents as provided to the grouting contractor shall include:

1. These Special Provisions.
2. Project drawings:
   a. Project Construction Plans.
   b. Existing underground utilities plan in the work area.

DEFINITIONS
A. Grout: A material blend of fine aggregate, cement and water to achieve a pumpable, thixotropic, viscous grout of a low slump to enable pumping at high pressure and remain intact after injection. Material components can include sand, cement, ground slag, fly ash, water and other admixtures.

B. Field Quality Control Representative: The individual given specific inspection tasks identified in this specification.

SCOPE OF WORK
A. The work shall consist of furnishing and installing grout placed under pressure to fill the void identified in the Plans.
B. In connection with the pressure grouting program, as shown on the drawings, the grouting contractor shall provide all labor, materials and equipment to accomplish the following items of work:

1. Prepare and furnish required submittals.
2. Construct all necessary formwork at void opening.
3. Install and remove grout pipes.
4. Furnish and inject grout.
5. Monitor surface and subsurface ground/structure movements during grouting operations.

C. It shall be the grouting contractor's responsibility to determine and implement the systems and criteria to ensure that specified improvement is achieved.

SUBMITTALS
A. The following shall be submitted to the Engineer prior to the pre-construction conference as evidence of the grouting contractor's experience:

1. A list of at least three previously completed projects of similar scope and purpose for approval by the Engineer. The list shall include a description of the project, relative size, and contact person with phone number.

B. The following shall be submitted to the Engineer a minimum of one week prior to the start of the work:

1. A mix design for the project indicating sources and types of grout materials, with volumetric proportions, and field test data from previous projects indicating compressive strength and slump. Standard Mn/DOT grout mixes are acceptable.
2. Work procedures and control criteria (including volumes and pressure for each stage).
3. A general Work Procedures Plan outlining the spacing, location, depth and estimated quantity of grout to effectively fill the void.

QUALITY ASSURANCE
A. The pressure grouting program, including installation of grout pipes, shall be performed by a contractor with at least three years of documented experience in pressure grouting.

GROUT MATERIALS
A. Portland Cement (ASTM C150)
B. Fine aggregate shall be sand with fines content (percent passing No. 200 sieve) of not more than 10 percent.

C. Proportions of the mixture shall be as required to achieve a pump-able mix.

D. Upon discharge into the pump hopper or holding tank, the grout must be continuously agitated. Mixed grout may not be held in the agitator for more than 1.5 hours unless a set retarder, approved by the Engineer, is used.

SITE EXAMINATION

A. Prior to submitting a bid price for the grouting, the Contractor shall conduct a site inspection. All access requirements, any work necessary to make site accessible and return of same to pre-construction conditions shall be included within price bid for the work.

PRESSURE GROUTING

A. Pressure grouting shall be performed in accordance with the approved grout injection point layout scheme. The grout shall be injected at the identified ports until it flows from vents installed in the form work and from vents drilled through the existing RCP.

B. Contractor shall select the appropriate pressure for grouting to achieve the goals of completely filling the existing void without damage to adjacent structures.

C. Stream flow shall be completely diverted and the work area and void shall be dewatered prior to starting the pressure grouting to prevent discharge of grout materials into the receiving waters. Do not allow stream flow adjacent to the repair area until an acceptable cure has been achieved.

D. Clean the repair area of loose grout, slurry and other foreign materials prior to allowing stream flow to resume.

FIELD QUALITY CONTROL

A. All pressure grouting shall be performed under the inspection of the Contractors Quality Control Representative.

B. After completion of the grouting and removal of forms work, visually inspect the repair. Repair any voids or honeycomb to the satisfaction of the Engineer in the field. Ensure that the finished surface will not interfere with subsequent phases of work such as pipe lining.
C. The Contractors Quality Control Representative shall perform slump tests of grout and take measurements of grout mix quantities to verify the grout mix, as follows:

1. Slump tests shall be performed by the Contractor, once for every 150 cubic feet of grout injected, at least once per day.

D. Contractors Quality Control Representative shall require the grouting contractor to cast minimum size 3 inch by 6 inch cylindrical molds for strength testing. One set of four cylinders or molds shall be cast during each slump test.

E. Layout of grout injection points shall be by the grouting contractor and checked by the Contractors Quality Control Representative.

REstrictions

A. The Contractor shall be responsible for obtaining any State and municipal permits (if required) and conforming to all State and local regulations.

B. The Contractor shall be responsible for conducting a Gopher One Call and associated utility locating and markout for the precise delineation of all above and below ground utilities and obstructions.

C. No discharge of grout, slurry or other materials will be permitted into Brewery Creek.

Measurement

A. Measurement for pressure grouting will be made by the cubic yard. No separate measurement will be made for any of the individual items necessary for performance of the work including but not limited to submittals, documentation and monitoring, site access and work necessary to make site accessible and restoration of same, grout pipes, grout, grout installation or grout testing except that separate payment will be made for items "Temporary Stream Diversion" and "Dewatering".

B. No measurement will be made under this item for grout placed for "Lining Sewer Pipe 60" or "Lining Sewer Pipe 63". Grout required for these two items is considered an incidental expense for which separate payment will not be made.

Payment

A. Payment for pressure grouting as detailed and specified herein and in the Plans will be made under Item 2301.607 "Pressure Grout" at the contract price per cubic yard and shall be considered payment in full for all work and incidentals as required for the complete foundation soil improvement program as detailed in the Plans and Special Provisions.
SP-22  
(2360) TYPE SP 12.5 WEARING COURSE MIXTURE (3,C)
Furnish and place bituminous wearing course mixture in two lifts as shown in the Plans. Placement and material requirements shall be per City of Duluth 2015 Standard Specifications for Construction and Mn/DOT 2360.

SP-23  
(2401) CONCRETE BRIDGE CONSTRUCTION
The provisions of MN/DOT 2401 shall apply on this project as supplemented and/or modified by the following:

SP-23.1  
Joint Filler and Sealer

The provisions of 2401.3.1.1, "Joint Sealing," are supplemented as follows:
Complete concrete curing prior to installation of sealing materials. A minimum of 14 days drying is required prior to application of sealers. Saw cut joints, sandblast, blow clean, and ensure the concrete surfaces are dry at the time the sealer is installed. Perform work as per manufacturer's recommendations.

Construct preformed joint(s) as detailed in the plans and in conformance with the following requirements.

1. Use bituminous felt that complies with AASHTO M33, modified to the extent that the load required to compress the test specimen to 50 percent of its thickness before test be not more than 1200 psi (8274 kPa).

2. Supply cork complying with 3702, "Preformed Joint Fillers".

3. Supply polystyrene complying with the following:

<table>
<thead>
<tr>
<th>Compressive Strength for Polystyrene Elements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Type</td>
</tr>
<tr>
<td>-----------------------------------------------</td>
</tr>
<tr>
<td>A (High Density)</td>
</tr>
<tr>
<td>B (Low Density)</td>
</tr>
</tbody>
</table>

Test for compressive strength of polystyrene in accordance with ASTM D 1621. Furnish evidence that the material meets these requirements, if requested by the Engineer.

SP-23.2  
Structure Excavation Class E
The item Structure Excavation shall include all excavation, sheeting and shoring, or other protection, and preparation of foundation for construction of the project. It shall also include the off-site disposal of surplus material. The work shall be performed in accordance with 2451, 2401 and all other applicable sections.

Notice is hereby given to the Contractor that all or parts of the work areas were constructed upon a former municipal landfill. Contractor shall notify the Engineer immediately if hazardous or contaminated waste is found during excavation work.

No measurement will be made of the excavated material or for any temporary shoring and other miscellaneous excavation or minor embankment work required to facilitate the construction of the project. All work performed as specified above will be considered to be included in a single lump sum for which payment is made under Item No. 2401.601, "Structure Excavation Class E".

**SP-24**

(2503) LINING SEWER PIPE 60" OR 63"

The provisions of MN/DOT 2401, 2433 & 2503 shall apply on this project as supplemented and/or modified by the following:

**SP-24.1 Description of Work**

This work shall consist of lining the existing RCP at the identified locations of the Brewery Creek Storm Sewer. The specification that follows is intended for a spirally wound lining made of steel reinforced HDPE. Contractor may alternately furnish a slip lining HDPE product at his option. Any and all additional costs that may be incurred as a result of selection of a slip lining option shall be borne solely by the Contractor. The maximum construction limits and site disturbance limits shown in the Plans shall not be exceed without approval from the Engineer for any method of lining. All costs resulting from excavation, removals and restoration in excess of that shown in the Plans shall be borne solely by the Contractor.

If Contractor elects to use slip lining the proposed lining shall match the specified interior diameters shown in the Plans. Contractor shall submit product data for approval at least 4 weeks prior to the planned work.

**SP-24.2 General**

This section includes requirements on materials and procedures for fixed diameter machine spiral wound high density polyethylene (HDPE) pipe liner with fully encapsulated steel reinforcing.

**SP-24.3 Summary**

Machine spiral wound steel reinforced HDPE liner is intended for use in the rehabilitation of sanitary and storm sewers without excavation of the host pipe. The lining process uses a continuous single piece HDPE profile strip reinforced with a fully
encapsulated continuous profiled steel strips for increased liner stiffness. The profile strip is machine wound directly into the deteriorated pipeline from an existing access chamber or manhole.

The system consists of a single, one part HDPE profile strip with "I" shaped ribs on one side. The edges of the strip are HDPE welded as it is spirally wound to form a liner inside the host pipe.

The steel strips are inserted into the HDPE profile strip and encapsulated at the point of manufacture. The combination of the HDPE profile together with the steel strips forms a composite structural liner.

A range of HDPE and steel strips are available with different profile, thickness and height configurations to match project design requirements.

The winding process is continuous until the complete length of the existing pipe between access points or manholes has been lined. The liner is wound at a fixed diameter, leaving an annular space between the liner and host pipe wall. The annulus shall be filled with cementitious grout.

Grouting of the annulus is only necessary to provide a load path from the liner pipe to the host pipe and to position the liner within the existing pipeline. The liner is independently structural and does not rely on the reinforcing effect of the grout.

SP-24.4 References

ASTM D 2444 : Test for Impact Resistance of Thermoplastic Pipe and Fittings by Means of a Tup (Falling Weight)

ASTM D 3350 : Standard Specification for Polyethylene Plastics Pipe and Fittings Materials
ASTM F 2136: Standard Test Method for Notched Constant Ligament-Stress (NCLS) Test to Determine Slow-Crack-Growth Resistance of HDPE Resins or HDPE Corrugated Pipe

SP-24.5 Material Composition
The extruded profile strip shall be made from HDPE compounds meeting the minimum requirements for cell classification 335420C or higher, as defined in ASTM D 3350.

The CA3 steel reinforcing shall be fully encapsulated, preventing exposure to corrosive elements.

SP-24.6 Material and Equipment Acceptance
At the time of manufacture, each lot of extruded profile strip shall be inspected for defects and tested for physical properties as specified. A “lot” is defined as a continuous extrusion run of a given profile designation on a spool.

HDPE profile strip minimum dimensions shall be in accordance with Table 1 below.

</table>

Design stiffness values for a specific combination of HDPE profile strip and steel reinforcing profile are available from the manufacturer.

Interlocking of the edges of HDPE strip is achieved with a site applied HDPE weld, suitable for use in a sewer environment.

SP-24.7 Material Testing
Before installation of the liner has commenced, a sample of profile from each production run shall be tested to confirm that the value of initial stiffness factor detailed in Table 1 exceeds specified minimum values.

SP-24.8 Marking
Each HDPE profile strip shall be distinctly marked on its inside surface at intervals not to exceed 1.5m (60 inches) with a code number identifying the manufacturer, plant, date of manufacture and shift, and profile type. This information shall also appear on each reel.

SP-24.9 Installation and Field Inspection
Installation of machine spiral wound HDPE liner pipe for rehabilitation of existing sewers shall comply with ASTM F 1741, except as modified herein.

The existing pipeline shall be cleaned of any obstructions, to a standard suitable for installation of the liner, and televised. All existing live service connections shall be precisely located longitudinally and radially, and logged for subsequent reinstatement following installation of the liner.

Bypass pumping is not mandatory for installation of the spiral wound liner. The Contractor shall be responsible for deciding the need for flow diversion to allow
successful liner installation. The Contractor shall be responsible for the cost of all cleanup and associated activities that may be required to rectify the effects of any spillage due to the liner installation.

During installation the winding machine shall perform the following operations simultaneously:

A continuous ribbed liner profile strip is supplied from a reel and fed down through the existing manhole to the winding machine positioned at the base of the manhole. The winding machine winds the HDPE strip into a liner pipe by welding the edges.

Winding continues until the full length of the deteriorated pipe between manholes has been lined.

End seals between the liner pipe and the existing pipe shall be installed with a sealing material that is compatible with the liner pipe material.

Grouting shall be introduced under pressure into the annulus. Grout can be injected into the annular space in a variety of ways, such as through openings in the end seals, or at reconnected service connections, or through grout holes drilled in the liner pipe at appropriate points. The grouting operation can take place either in a continuous stage or in lifts, depending on the condition of the host pipe, diameter and length. The grout should consist of the following: Portland cement, water, fly ash or lime and admixtures as needed.

Any holes made in the liner for this operation shall be sealed in a manner approved by the Engineer.

The transition between the liner invert and the invert in the manhole base shall be rendered smooth to reinstate the sewer flow line.

SP-24.10 Service Connections
The Contractor shall reinstate all live junctions immediately after installation of the liner. Service connections may be reinstated by excavation or internally.

The service connection openings shall conform to the shape and size of the inside diameter of the existing service connection.

Service connection openings shall be reinstated to 95 -100% of their diameter and free from rough edges or protrusions.

SP-24.11 Post Installation Inspection
A closed circuit television (CCTV) inspection or hands-on field inspection shall be carried out after installation to establish that the lining has been installed as specified and all live junctions have been reinstated.

The finished lining shall be free of defects that would affect long term strength or hydraulic performance.

SP-24.12 Measurement and Payment
Measurement shall be made by the linear foot measured along the slope of the pipe from end to end of liner with deductions made for manholes. No deductions will be made for services or other existing junction pipes.

Payment shall be made at the Contract unit price per linear foot and shall be considered compensation in full for all costs associated with furnishing and installing the liner to the satisfaction of the Engineer except excavation, partial manhole removal, and related reconstruction of facilities and surfacing to the limits shown in the Plans which is paid for under the respective bid items.

SP-25 (2564) INSTALL SIGN
The provisions of MN/DOT 2564 shall apply on this project as supplemented and/or modified by the following:

Furnish and install sign as shown in the plans and at the location as directed by the engineer.

Measurement shall be per each and payment as such shall include all costs associated with furnishing and installing the sign, flanged channel sign post and all hardware.

SP-26 (2572) METAL REINFORCEMENT
The provisions of MN/DOT 2572 shall apply on this project as supplemented and/or modified by the following:

Delete the first paragraph of 2472.3.D.1, "Lap Splices," and substitute the following:

Provide lap splices as shown on the plans. If not shown on the plans, provide bar reinforcement lap lengths equal to at least 36 diameters for No. 7 [22] bar and smaller and at least 40 diameters for No. 8 [25] bar through No. 11 [36] bar. Lap bar reinforcement for No. 14 [43] bar through No. 18 [57] bar as approved by the Engineer in writing.

Delete Table 2472-2, "Reinforcement Bars Theoretical Weights Nominal Dimensions," and substitute the following:
Reinforcement bars may be marked in either U.S. Customary or metric sizes. Make conversions per the following table:

<table>
<thead>
<tr>
<th>Bar Size, Designation Number</th>

</tbody>
</table>

* Bar designation numbers approximate the nominal diameter of the bar in millimeters

SP-27 (2563) TRAFFIC CONTROL

The provisions of MN/DOT 2563 shall apply on this project as supplemented and/or modified by the following:

Furnish, install and maintain traffic control in accordance with 2015 City of Duluth Construction Standards.

SEE REVERSE SIDE FOR FEE SCHEDULE AND ADDITIONAL REQUIREMENTS

(Attach the Erosion and Sediment Control Plan (ESCP) to this application page)

**MS-4 Statement of Compliance** (not for permanent stormwater management)

The property owner and the contractor conducting work on the site are responsible for all the construction activities that occur on the site. By signing this permit both parties are required to install and maintain all erosion and sediment control BMPs to ensure that sediment, soil and debris does not leave the construction site. This includes but is not limited to tracking of soil/mud onto public streets and roadways from vehicles leaving the site, soil eroding from the site onto roadways or drainage ditches or onto neighboring property. If sediment, soil/mud and/or debris leaves the site, both parties are responsible for the immediate clean up and all costs and fines associated with it. Both parties are also responsible for the total restoration of vegetation on the site (seed/mulch, sod, gardens…) after construction disturbance is substantially complete, and only after vegetation has been established with vigorous growth can BMPs be cleaned and removed.

<td>N/A</td>
</tr>
</tbody>
</table>

* All projects regardless of area disturbed, will be inspected for compliance with Erosion and Sediment Control Best Management Practices (BMPs), see attached.
** If city engineer determines that the proposed development is in a vulnerable area (steep slopes, erodible soils, adjacent to sensitive areas, etc.) and may cause degradation of the waters connected to the City’s storm water system, then the provisions applicable to land disturbance areas between 3,000 and 10,000 sq. ft. shall apply.
*** A site specific Storm Water Pollution Prevention Plan (SWPPP) meeting MPCA NPDES Permit requirements for Construction Activity is required and shall be submitted to the City for review. An individual one-family or two-family residence (that is not part of a common plan of development) with less than 10,000 sq. ft. of disturbance and less than 7,500 sq. ft. of new impervious area does not have to prepare a SWPPP, but shall submit an erosion control plan meeting the requirements of this document and attachments.
**** The MPCA Permit No. MN R 100001 is required (General Permit Authorization to Discharge Stormwater Associated with Construction Activity under the National Pollutant Discharge Elimination), and a copy of permit to be submitted to City. See this page for internet link.

**NOTE:** For projects disturbing one acre or more, the MPCA Stormwater Permit for Construction Activity must be completed--not the City of Duluth's form. [www.pca.state.mn.us/water/stormwater/stormwater-c.html](http://www.pca.state.mn.us/water/stormwater/stormwater-c.html)

The entire MS4 Permit may also be found at the MPCA: [website](http://www.pca.state.mn.us/water/stormwater/stormwater-ms4.html#requirements)

**City of Duluth Erosion and Sediment Control Plan Guidelines**

**Erosion and Sediment Control Plan (ESCP)**
The Permit Application should be filled out and the Erosion and Sediment Control Plan should be prepared as follows:
- Complete the attached Narrative form Item No. 1, or use a separate sheet. Fill in all areas as completely as possible.
- Complete a Site Map / Plan showing the items listed below in item No. 2 and see Elements of Erosion Control Plan, Site Map Requirements for further guidance to address specific item for each plan. Additionally see example site map / plan.
- Incomplete Narratives or Site Map / Plans will be returned for additional information and will delay permit approval.

**Erosion and Sediment Control Methods**
Control of sediment is required so that it does not migrate to an adjoining property, roadway, catch basin, or a wetland/watercourse. Diagrams are attached that depict some of the control methods commonly used for erosion and sediment control. Silt fence barriers and crushed rock temporary entrances are common control methods that can be effective for small projects. Additional methods, such as sediment traps and detention structures, are required for some projects and a qualified professional may need to specify the appropriate erosion and sediment control methods. See attached sheet titled Commonly Used Erosion Controls.

**Activities Exempt from the Ordinance**
Minor land disturbing activities are exempt such as: home gardens, landscaping, repairs and maintenance work, utility work, certain septic tank work, fencing, tilling, planting, or harvesting of agricultural, horticultural, or silviculture crops, and certain emergency repairs.
City Erosion/Sediment Control Permit Narrative -rev 2011

These are the absolute minimum submittal requirements for all projects:

(1) NARRATIVE
A) Provide a description of what you are doing and type foundation/disturbance.
   (e.g., constructing a 2,000 sq ft house w/full basement; constructing an attached 24x24 garage on slab;
   building a 20x15 house addition on frost footings, etc.)

B) How much land are you disturbing? Total: __________________ square feet
   Main soil type? __________ Are you importing/exporting any fill? ___ Amount____________

C) Describe the slope of the land and the slope of the adjacent land.

D) Describe all temporary erosion control devices you intend to use and show on an attached drawing where and
   when you will be installing them. [At a MINIMUM, you must have perimeter control such as silt fence and
   washed rock construction entrance.] Also, show and protect all stockpiles.

E) Final Stabilization. Date you will sod, or seed & mulch, or otherwise establish vegetation on the disturbed area.
   Method: __________________ Target Date: __________________
   If site is not vegetated by October 30th, describe below your selected winter-over methods (mulch, erosion
   blanket, etc.).

(2) DRAWING
A) *Always clearly show* the site grading/disturbance limits.
   *Also, show pre- and post-development drainage arrows.*

B) *Clearly show* estimated land contours (hand drawn is acceptable for small projects).

C) *Show any/all* creeks, ditches, wetlands, or other sensitive areas within 200 feet of your site.
   *If none, so state: _________________*

D) *Clearly show* the amount and placement of silt fence, hay bales, construction entrance, etc.

E) *Clearly show* washed rock construction entrance. [Minimum: 12' W x 50' L x 6' deep] OR show mud mat
   reusable mat - 8' x 45' minimum (see Brock White handout).

F) *Show and label streets and adjacent properties.*
   *Show catch basins/inlets.*
   *Clearly show* all protective measures for those areas where sediment could migrate. Protect your neighbor's
   property from your construction activity and potential erosion and sediment.

**For Large Projects, Commercial Projects, Complex Projects -
Additional information and design are required - refer to City Ordinance 9365**
Technical assistance: Engineering 730-5200; [Tom Johnson 730-5103]
GENERAL NOTES FOR EROSION CONTROL

STRAW BALES or SILT FENCE
* Put up before any other work is done
* Install on downslope side(s) of site with ends extended up sideslopes a short distance
* Place parallel to the contour of the land
to allow water to pond behind the fence
* Entrench 4 inches deep (see diagram)
* Stake (every 3 feet minimum)
* Leave no gaps/ overlap if necessary
* Inspect often and maintain
* Remove sediment when deposits reach half way up fence or bale

ROCK CONSTRUCTION ENTRANCE
* Install a single construction access using large crushed rock (1 1/2 “ to 2 1/2 ”) to preventtracking of soils off project site
* Put rock 6 inches deep, 12 feet wide, 50 feet long
* Maintain rock access through project end
* All vehicles to use rock entrance

SEDIMENT CLEANUP
* By the end of each work day, sweep/scrape up soil tracked on roads, alley, sidewalk
* After a storm clean up soil washed off site onto sidewalks, streets, alleys.

REVEGETATION
* Seed & mulch, sod or mulch disturbed area as soon as project is completed

PRESERVING EXISTING VEGETATION
* Preserve existing trees, shrubs, sod, as much as possible

WARNING! Extra measures may be needed if your site:
* Has highly erodible soils
* Is within 200 feet of a river or stream
* Is within 1,000 feet of a lake
* Is steeply sloped
* Receives runoff from adjacent land

For more information on appropriate measures for your site, please call the City of DuluthEngineering Division at 730-5200.
ELEMENTS OF EROSION & SEDIMENT CONTROL PLAN (ESCP)

ESCP Project Narrative
(1) Project description
(2) Phasing of construction
(3) Existing site conditions
(4) Adjacent areas affected by project
(5) Critical areas identified
(6) Erosion and sediment control measures
(7) Soil descriptions
(8) Permanent stabilization methods
(9) Stormwater management considerations
(10) Maintenance schedule for erosion and sediment measures
(11) Calculations
(12) Additional information required by the city engineer

Criteria to be considered in the ESCP
(1) Stabilization of denuded areas and soil stockpiles
(2) Establishment of permanent vegetation
(3) Protection of adjacent properties
(4) Timing and stabilization of sediment trapping measures
(5) Use of sediment basins
(6) Cut and fill slopes
(7) Stormwater management criteria for controlling off site erosion
(8) Stabilization of waterways and outlets
(9) Stormwater management criteria for controlling off site erosion
(10) Working in or crossing water bodies
(11) Underground utility construction
(12) Construction access routes
(13) Disposition of temporary erosion and sediment
(14) Maintenance of erosion and sediment control practice

Site Map Requirements
(1) Location Map
(2) North Arrow
(3) Scale (1 inch = 100 ft. or greater detail)
(4) Benchmark
(5) Existing contours at two ft. intervals, 200 ft. beyond boundary - show watercourses/wetlands
(6) Final contours
(7) Existing vegetation - trees, shrubs, grasses
(8) Soil boundaries
(9) Property boundary and lot lines
(10) Elevations and grades - street grades, pond elevations, etc.
(11) Drainage arrows
(12) Critical erosion areas
(13) Clearing and grabbing limits
(14) Utility plans
(15) Location of erosion and sedimentation control practices - basins, swales, silt fence, bales
(16) Location of other practices
(17) Plan preparer's signature, address and phone number
(18) Responsible party name, address, and phone number
(19) Delineation of applicable zoning boundaries
Rock Construction Entrance

- 20 feet minimum
- 6 inches minimum
- Filter fabric/underliner
- 1.5-3 inch rock
- Existing road

Perimeter Control – Bio Rolls

- Fiber roll
  - 8" minimum
- Trench
  - 2-4" wood stake
- Install fiber roll along the contour
- 4 feet max.
1) Use of Separate Bid Forms. These contract documents include a complete set of bidding and contract forms which are for the convenience of bidders and are not to be detached from the contract document, completed, or executed. Separate copies of bid forms are furnished for that purpose.

2) Interpretations or Addenda. No oral interpretation will be made to any bidder as to the meaning of the contract documents or any part thereof. Every request for such an interpretation shall be made in writing to the city of Duluth. Any inquiry received seven or more days prior to the date fixed for opening of bids shall be given consideration. Each interpretation made to a bidder will be in the form of an addendum to the contract documents, and when issued, will be on file in the office of the city engineer at least five days before bids are opened. In addition, all addenda will be mailed to each person holding contract documents, but it shall be the bidder's responsibility to make inquiry as to the addenda issued. All such addenda shall become part of the contract and all bidders shall be bound by such addenda, whether or not received by the bidders.

3) Inspection of Site. Each bidder should visit the site of the proposed work and fully acquaint himself with the existing conditions there relating to construction and labor, and should fully inform himself as to the facilities involved, the difficulties, and the restrictions attending the performance of the contract. The bidder shall thoroughly examine and familiarize himself with the drawings, technical specifications, and all other contract documents. The contractor, by the execution of the contract, shall in no way be relieved of any obligation under it due to his failure to receive or examine any form or legal instrument or to visit the site and acquaint himself with the conditions there existing; the city of Duluth will be justified in rejecting any claim based on facts regarding which he should have been on notice as a result thereof.

4) Alternative Bids. No alternative bids or bid items will be considered unless alternative bids are specifically requested by the technical specifications.

5) Bids
   a) All bids must be submitted on forms supplied by the city engineer and shall be subject to all requirements of the contract documents, including the drawings, and these Instructions to Bidders. All bids must be regular in every respect; no interlineations, excisions, or special conditions shall be made or included in the bid form by the bidder.
   b) Bid documents, including the bid and the bid guaranty, shall be enclosed in an envelope which shall be sealed and clearly labeled with the project number, if any, name of bidder, and date and time of bid opening, in order to guard against premature opening of the bid. If the proposal is mailed, this envelope shall be placed in another envelope which shall be sealed and labeled with project number, if any, name of bidder, and date and time of bid opening -- and addressed to city of Duluth purchasing manager, room 100 City Hall, Duluth, Minnesota 55802.
   c) The city of Duluth may consider as irregular any bid on which there is an alteration of or departure from the bid form hereeto attached and, at its option, may reject the same.
   d) If the project is awarded, it will be awarded by the city of Duluth to the lowest responsible bidder assuming that the bids are within funds available based on the lowest base bid and or in combination with selected alternates (if any). The alternates will be accepted in descending order. By the award of the contract, it is assumed that the work will be completed within the time-frame as specified within the contract documents.
   e) Each bidder shall include in his bid the following information:
      Principals -- names, home addresses including city, state, and zip code
      Firm -- name, federal i.d. number, address, city, state, and zip code
      Mechanical & Electrical Subcontractors -- names of firms that will do the mechanical and electrical work and the amounts of the mechanical and electrical sub-bids, if applicable and when (where indicated on Bid Proposal form).

6) Bid Guaranty
   a) The bid shall be accompanied by a bid guaranty which shall not be less than five percent (5%) of the amount of the bid. At the option of the bidder, the guaranty may be a certified check, bank draft, negotiable U.S. Government bond (at par value), or a bid bond. No bid will be considered unless it is accompanied by the required guaranty. Certified check or bank draft must be made payable to the order of the city of Duluth, Minnesota. Cash deposits will not be accepted. The bid guaranty shall ensure the execution of the agreement and the furnishing of the surety bond or bonds by the successful bidder, all as required by the contract documents.
b) Revised bids submitted before the opening of bids, whether forwarded by mail, fax, or in person, if representing an increase in excess of two percent (2%) of the original bid, must have bid guaranty adjusted accordingly; otherwise, the bid will not be considered.

c) Certified checks or bank drafts, or the amount thereof, bid bonds, and negotiable U.S. Government bonds of unsuccessful bidders, will be returned as soon as practical after the opening of bids.

7) Collusive Agreements

a) The successful bidder on each city of Duluth construction project shall be required to execute a city of Duluth non-collusive affidavit to the effect that he has not entered into a collusive agreement with any other person, firm, or corporation in regard to any bid submitted.

b) Before executing any subcontract, the successful bidder shall submit the name of any proposed subcontractor for prior approval on the MnDOT Request to Sublet Form TP-21834 (standard specification 1801).

8) Unit Prices

The unit price, for each of the several items in the proposal of each bidder, shall include its prorata share of overhead so that the sum of the products obtained by multiplying the quantity shown for each item by the unit price bid represents the total bid. Any bid not conforming to this requirement may be rejected as informal.

The special attention of all bidders is called to this provision; for should conditions make it necessary to revise the quantities, no limit will be fixed for such increased or decreased quantities nor extra compensation allowed, provided the net monetary value of all such additive and subtractive changes in quantities of such items of work (i.e., difference in cost) shall not increase or decrease the original contract price by more than twenty-five percent (25%) on major bid items, except for work not covered in the drawings and technical specifications.

9) Corrections

Erasures or other changes in the bids must be explained or noted over the signature of the bidder.

10) Time for Receiving Bids

a) Bids received prior to the advertised hour of opening will be securely kept, sealed. The officer, whose duty it is to open them, will decide when the specified time has arrived and no bid received thereafter will be considered; except that when a bid arrives by mail after the time fixed for opening, but before the reading of all other bids is completed, and it is shown to the satisfaction of the city purchasing office that the non-arrival on time was due solely to delay in the mails for which the bidder was not responsible, such bid will be received and considered.

b) Bidders are cautioned that, while fax modifications of bids may be received as provided above, such modifications, if not explicit and if in any sense subject to misinterpretation, shall make the bid so modified or amended, subject to rejection.

11) Opening of Bids

At the time and place fixed for the opening of bids, the city purchasing manager will cause to be opened and publicly read aloud every bid received within the time set for receiving bids, irrespective of any irregularities therein. Bidders and other persons properly interested may be present in person or by representative.

12) Withdrawal of Bids

Bids may be withdrawn on written or faxed request dispatched by the bidder in time for delivery in the normal course of business to the time fixed for opening; provided, that written confirmation of any faxed withdrawal over the signature of the bidder is placed in the mail and postmarked prior to the time set for bid opening. The bid guaranty of any bidder withdrawing his bid in accordance with the foregoing conditions will be returned promptly.

13) Responsible Contractor Verification and Certification of Compliance

The Department cannot award a construction contract in excess of $50,000 unless the Bidder is a "responsible contractor" as defined in Minnesota Statutes §16C.285, subdivision 3. A Bidder submitting a Proposal for this Project must verify that it meets the minimum criteria specified in that statute by submitting the Responsible Contractor Verification and Certification of Compliance form. A company owner or officer must sign the Responsible Contractor Verification and Certification of Compliance form under oath verifying compliance with each of the minimum criteria. Bidders must obtain verifications of compliance from all subcontractors. A Bidder must submit signed copies of verifications and certifications of compliance from subcontractors upon the Department's request.

A Bidder or subcontractor who does not meet the minimum criteria established in Minnesota Statutes §16C.285, subdivision 3, or who fails to verify compliance with the criteria, will not be a "responsible contractor" and will be ineligible to be awarded the Contract for this Project or to work on this Project. Making a false statement verifying compliance with any of the minimum criteria will render the Bidder or subcontractor ineligible to be awarded a contract.
construction contract for this Project and may result in the termination of a contract awarded to a Bidder or subcontractor that makes a false statement.

A Bidder must also identify each subcontractor it intends to use on the Project. A Bidder must complete Attachment A-1 and submit it with the Responsible Contractor Verification and Certification of Compliance form, identifying each subcontractor it intends to use as of the time of bid submission. Include the project number specific to the bid on each form. The completed Certification Forms must be submitted with the Bid Proposal.

If the Bidder retains additional subcontractors after submitting its Responsible Contractor Verification and Certification of Compliance form, then the Bidder must submit Attachment A-2 within 14 days of retaining the additional subcontractor. Documents must be submitted to the Project Engineer. Include the project number specific to the bid on the form.

14) Award of Contract: Rejection of Bids
   a) The contract will be awarded to the responsible bidder submitting the lowest bid complying with the conditions of the Invitation to Bid. The bidder, to whom the award is made, will be notified at the earliest possible date. The city of Duluth, however, reserves the right to reject any and all such bids and to waive any informality in bids received whenever such rejection or waiver is in its interest.
   b) The city of Duluth reserves the right to consider as unqualified to do the work of general construction, any bidder who does not habitually perform with his own forces the major portions of the work involved in construction of the improvements embraced in the contract documents. A project labor agreement will be included in all contracts exceeding $150,000.

15) Execution of Agreement: Performance and Payment Bond.
   a) Subsequent to the award and within ten (10) days after the prescribed forms are presented for signature, the successful bidder shall execute and deliver to the city of Duluth an agreement in the form as furnished by the City, in such number of copies as the city of Duluth may require.
   b) Having satisfied all conditions of award as set forth elsewhere in these documents, the successful bidder shall, within the period specified in paragraph "a" above, furnish:
      1) A performance bond for the use and benefit of the city of Duluth to complete the contract according to its terms, and conditioned on saving the city of Duluth harmless from all costs and charges that may accrue on account of completing the specified work; and
      2) A payment bond for the use and benefit of all persons furnishing labor and materials for the performance of the contract conditioned upon the payment, as they become due, of all just claims for labor and materials. Both the performance bond and the payment bond shall be in a penal sum of not less than the amount of the contract awarded. Such bonds shall be in the same form as that included in the contract documents and shall bear the same date as, or a date subsequent to, that of the agreement. A current power of attorney for the person who signs for any surety company shall be attached to such bonds.
   c) The failure of the successful bidder to execute such agreement to supply the required bond or bonds within ten (10) days after the prescribed forms are presented for signature, or within such extended period as the city of Duluth may grant, based on reasons determined sufficient by the city of Duluth, shall constitute a default, and the city of Duluth may either award the contract to the next lowest responsible bidder or re-advertise for bids, and may charge against the bidder the difference between the amount of the bid and the amount for which a contract for the work is subsequently executed, irrespective of whether the amount thus due exceeds the amount of the bid bond. If a more favorable bid is received by re-advertising, the defaulting bidder shall have no claim against the city of Duluth for a refund.

16) Wages and Salaries
   a) Attention of bidders is particularly called to the requirements concerning the payment of not less than the prevailing wage and fringe benefit rates specified in the contract documents and the conditions of employment with respect to certain categories and classifications of employees.
   b) The rates of pay set forth in prevailing wage schedule(s) are potentially the minimums to be paid during the life of the contract. Project funding sources, bid opening date, contract award date, and the contract start date may be factors resulting in a change of prevailing wage schedules. It is, therefore, the responsibility of bidders to inform themselves as to local labor conditions, such as the length of work day hours in conjunction with the
project's funding sources, overtime compensation, health and welfare contributions, labor supply, and prospective changes or adjustments of rates. A project labor agreement will be included in all contracts exceeding $150,000.

17) Equal Employment Opportunity  Attention of bidders is particularly called to the requirement for ensuring that employees and applicants for employment are not discriminated against because of their race, color, religion, sex, or national origin. (See Supplementary General Conditions, Part II, Section 11).

18) Employment and Business  Attention of bidders is particularly called to the requirement that, to the greatest extent feasible, opportunities for training and employment made possible by this project shall be given to lower income residents of the city of Duluth. Additionally, if any work is subcontracted, efforts should be made to award subcontracts to concerns located in or owned in substantial part by persons residing in the city of Duluth.

19) Sales and Use Taxes  It is assumed that, in the preparation of his proposal, the bidder has taken into consideration his/her liability from any sales, use, or excise tax that might be assessed in the purchase of, storage, use, or consumption of any materials, services, or supplies for performance of the contract work. Any such tax paid by the contractor will be considered as his/her expense, for which no direct compensation will be made by the city to the contractor over and above the accepted bid.

20) Pre-Bid/Pre-Construction Meetings
   a) Should a pre-bid meeting will be held, it will be conducted seven (7) days prior to the bid date (see Invitation to Bid for time and place). All potential bidders are encouraged to attend. All bidders will be allowed to make inquiries regarding the contract documents. All formal decisions will be documented by addendum.
   b) Approximately seven (7) days after city council approval of contract award, the successful bidder is required to attend a pre-construction meeting. At this meeting, the successful bidder will present his/her construction schedule, cost breakdown, required submittals, etc.

   a) The successful bidder on each city of Duluth construction project shall be required to execute a certificate substantially in the form herein provided.
   b) Before executing any subcontract in excess of $2,500, the successful bidder shall require the subcontractor to execute a form similar in nature to the form herein provided.
DATA FOR LABOR COST BIDDING

NOTE:
Wage Decisions are subject to change due to lock-in rules and revisions near the bid opening.

Project No.: 0032ST

Name: Rehabilitation and Reline of Brewery Creek Storm Sewer Sections 29 & 31

City Project Manager: Tom Johnson

Bid Opening Date: 9/2/2015

This project is funded by:

City of Duluth

The base workweek may be:

Five 8-hour days OR four 10-hour days with OT after each
AND
OT after 40 hours per week

The project DOES contain a project labor agreement (PLA).
Should a project contain a project labor agreement:
1) Union scale may not be reflected in the prevailing wage schedule(s)
2) Note Article II Section 10 for trucking labor costs

City of Duluth funding only:
Each certified payroll must indicate the base workweek on the accompanying MnDOT Statement of Compliance form and beside each employee’s name when his/her hours differ from the normal base workweek, if applicable.

OVERTIME REQUIREMENTS:
For projects funded by the City of Duluth: overtime must be paid on daily hours worked in excess of the base daily hours. Contractors (including sub-contractors) are not allowed to pay overtime solely on hours in excess of forty per week.

The overtime rate must be paid at NO LESS than the rate of pay as established in the project's wage decision multiplied by one and one-half OR the base rate the employee is being paid if it is higher than the wage decision base rate.

Project Prevailing Wage Decision: USDOL Heavy 06/12/15
USDOL Highway 01/02/15
General Decision Number: MN150121 07/31/2015  MN121
Superseded General Decision Number: MN20140121
State: Minnesota
Construction Type: Highway
Counties: Carlton, Cook, Itasca, Koochiching, Lake, Pine and St Louis Counties in Minnesota.

HIGWAY CONSTRUCTION PROJECTS

Note: Executive Order (EO) 13658 establishes an hourly minimum wage of $10.10 for 2015 that applies to all contracts subject to the Davis-Bacon Act for which the solicitation is issued on or after January 1, 2015. If this contract is covered by the EO, the contractor must pay all workers in any classification listed on this wage determination at least $10.10 (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on the contract. The EO minimum wage rate will be adjusted annually. Additional information on contractor requirements and worker protections under the EO is available at www.dol.gov/whd/govcontracts.

TRUCK DRIVER CLASSIFICATIONS:

GROUP 1: Mechanic, Welder; Tractor Trailer; Truck hauling machinery including operation of hand and power operated winches.
GROUP 2: Four or more axle unit straight body truck.

GROUP 3: Bituminous Distributor driver; Bituminous Distributor (one person operation); Three Axle units.

GROUP 4: Bituminous Distributor Spray operator (rear and oiler); Dump Person; Greaser; Pilot Car; Rubber Tire self-propelled Packer under 8 tons; Two Axle unit; Slurry Operator; Tank Truck Tender (gas, road oil, water); Tractor under 50 hp.

Tunnel Miner $ 27.67  16.21

WELDERS - Receive rate prescribed for craft performing operation to which welding is incidental.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of "Identifiers" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than "SU" or "UAVG" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.
Survey Rate Identifiers

Classifications listed under the "SU" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

Union Average Rate Identifiers

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

* an existing published wage determination
* a survey underlying a wage determination
* a Wage and Hour Division letter setting forth a position on a wage determination matter
* a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial
contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations  
Wage and Hour Division  
U.S. Department of Labor  
200 Constitution Avenue, N.W.  
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator. (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator  
U.S. Department of Labor  
200 Constitution Avenue, N.W.  
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board  
U.S. Department of Labor  
200 Constitution Avenue, N.W.  
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

END OF GENERAL DECISION
General Decision Number: MN150105 06/12/2015 MN105

Superseded General Decision Number: MN20140105

State: Minnesota

Construction Type: Heavy

County: St Louis County in Minnesota.

HEAVY CONSTRUCTION PROJECTS

Note: Executive Order (EO) 1658 establishes an hourly minimum wage of $10.10 for 2015 that applies to all contracts subject to the Davis-Bacon Act for which the solicitation is issued on or after January 1, 2015. If this contract is covered by the EO, the contractor must pay all workers in any classification listed on this wage determination at least $10.10 (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on the contract. The EO minimum wage rate will be adjusted annually. Additional information on contractor requirements and worker protections under the EO is available at www.dol.gov/whd/govcontracts.

WELDERS - Receive rate prescribed for craft performing operation to which welding is incidental.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after
award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of "identifiers" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than "SU" or "UAVG" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

Survey Rate Identifiers

Classifications listed under the "SU" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

Union Average Rate Identifiers
Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

-------------------------------------
WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

* an existing published wage determination
* a survey underlying a wage determination
* a Wage and Hour Division letter setting forth a position on a wage determination matter
* a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

    Branch of Construction Wage Determinations
    Wage and Hour Division
    U.S. Department of Labor
    200 Constitution Avenue, N.W.
    Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

    Wage and Hour Administrator
    U.S. Department of Labor
    200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

------------------------------------------------------------------------

END OF GENERAL DECISION
City of Duluth
Indemnification & Insurance Requirements
(Updated February 16, 2011)

(Please Be Sure These Requirements Can Be Met before Submitting Your Response)

INDEMNIFICATION CLAUSE

The Contractor will defend, indemnify and save the City harmless from all costs, charges, damages, and loss of any kind that may grow out of the matter covered by this contract. Said obligation does not include indemnification of the City for claims of liability arising out of the sole negligent or intentional acts or omissions of City but shall include but not be limited to the obligation to defend, indemnify and same harmless the City in all cases where claims of liability against the City arise out of acts or omissions of City which are derivative of the negligence or intentional acts or omissions of Contractor such as, and including but not limited to, the failure to supervise, the failure to warn, the failure to prevent such act or omission by Contractor and any other such source of liability. In addition, Contractor will comply with all local, state and federal laws, rules and regulations applicable to this contract and to the work to be done and things to be supplied hereunder.

INSURANCE

a. Contractor shall provide the following minimum amounts of insurance from insurance companies authorized to do business in the state of Minnesota, which insurance shall indemnify Contractor and City from all liability described in the paragraph above, subject to provisions of subparagraph below.

(1) Worker’s compensation in accordance with the laws of the state of Minnesota.

(2) Public Liability and Automobile Liability Insurance with limits not less than $1,500,000 Single Limit, and twice the limits provided when a claim arises out of the release or threatened release of a hazardous substance; shall be in a company approved by the city of Duluth; and shall provide for the following: Liability for Premises, Operations, Completed Operations, Independent Contractors, and Contractual Liability.

(3) City of Duluth shall be named as Additional Insured under the Public Liability, Excess/Umbrella Liability* and Automobile Liability, or as an alternate, Contractor may provide Owners-Contractors Protective policy, naming itself and the City of Duluth. Contractor shall also provide evidence of Statutory Minnesota Worker’s Compensation Insurance. Contractor to provide Certificate of Insurance evidencing such coverage with 30-days notice of cancellation, non-renewal or material change provisions included. The City of Duluth does not represent or guarantee that these types or limits of coverage are adequate to protect the Contractor’s interests and liabilities.
An umbrella policy with a "following form" provision is acceptable if written verification is provided that the underlying policy names the City of Duluth as an additional insured.

(4) If a certificate of insurance is provided, the form of the certificate shall contain an unconditional requirement that the insurer notify the City without fail not less than 30 days prior to any cancellation, non-renewal or modification of the policy or coverages evidenced by said certificate and shall further provide that failure to give such notice to City will render any such change or changes in said policy or coverages ineffective as against the City.

(5) The use of an "Acord" form as a certificate of insurance shall be accompanied by two forms – 1) ISO Additional Insured Endorsement (CG-2010 pre-2004) and 2) Notice of Cancellation Endorsement (IL 7002) or equivalent, as approved by the Duluth City Attorney’s Office.

b. The insurance required herein shall be maintained in full force and effect during the life of this Agreement and shall protect Contractor, its employees, agents and representatives from claims and damages including but not limited to personal injury and death and any act or failure to act by Contractor, its employees, agents and representatives in the negligent performance of work covered by this Agreement.

c. Certificates showing that Contractor is carrying the above described insurance in the specified amounts shall be furnished to the City prior to the execution of this Contract and a certificate showing continued maintenance of such insurance shall be on file with the City during the term of this Contract.

d. The City shall be named as an additional insured on each liability policy other than the workers’ compensation policies of the Contractor.

e. The certificates shall provide that the policies shall not be changed or canceled during the life of this Contract without at least 30 days advanced notice being given to the City.

f. Contractor shall be required to provide insurance meeting the requirements of this Paragraph unless Contractor successfully demonstrates to the satisfaction of the City Attorney, in the exercise of his or her discretion, that such insurance is not reasonably available in the market. If Contractor demonstrates to the satisfaction of the City Attorney that such insurance is not reasonably available, the City attorney may approve an alternative form of insurance which is reasonably available in the market which he or she deems to provide the highest level of insurance protection to the City which is reasonably available.

**BID NO. 15-0527 / CITY PROJECT NO. 00357**
AFFIDAVIT AND INFORMATION REQUIRED OF BIDDERS

Affidavit of Non-Collusion:

I hereby swear (or affirm) under penalty of perjury:

1) That I am the bidder (if the bidder is an individual), a partner in the bidder (if the bidder is a partnership), or an officer or employee of the bidding corporation having authority to sign on its behalf (if the bidder is a corporation);

2) That the attached bid or bids have been arrived at by the bidder independently and have been submitted without collusion with and without agreement, understanding, or planned common course of action with any other vendor or materials, supplied, equipment or services described in the invitation to bid, designed to limit independent bidding or competition;

3) That the contents of the bid or bids have not been communicated by the bidder or its employees or agents to any person not an employee or agent of the bidder or its surety on any bond furnished with the bid or bids and will not be communicated to any such person prior to the official opening of the bid or bids; and

4) That I have fully informed myself regarding the accuracy of the statements made in this affidavit.

EQUAL EMPLOYMENT OPPORTUNITY (EEO) AFFIRMATIVE ACTION
POLICY STATEMENT & COMPLIANCE CERTIFICATE

TO: City of Duluth, Minnesota PROJECT NUMBER & DESCRIPTION ____________________________

FROM: ____________________________________________

(FIRM’s name, address, telephone number)

A) Employment: It is the policy of the above named FIRM to afford equal opportunity for employment to all individuals regardless of race, color, creed, religion, national origin, ancestry, age, sex, marital status, status with respect to public assistance and/or disability. The FIRM will take affirmative action to ensure that we will: (1) recruit, hire, and promote all job classifications without regard to race, color, creed, religion, national origin, ancestry, age, sex, marital status, status with respect to public assistance, and/or disability, except where sex is a bona fide occupational qualification; (2) base decisions on employment so as to further the principle of equal employment opportunity; (3) ensure that promotion decisions are in accord with the principles of equal employment opportunity by imposing only valid requirements for promotional opportunities; (4) ensure that all personnel actions such as compensation, benefits, transfers, layoffs, return from layoff, FIRM sponsored training, education tuition assistance, social and recreational programs will be administered without regard to race, color, creed, religion, national origin, ancestry, age, sex, marital status, status with respect to public assistance, and/or disability. The FIRM also intends full compliance with Veteran affirmative action requirements. Additionally, minority and female employees shall be encouraged to participate in all FIRM activities and refer applicants.

I have designated (name) _______________________________ to direct the establishment of and to monitor the implementation of personnel procedures to guide the FIRM’s affirmative action program. Where PROJECTS exceed $500,000, this official shall also serve as the liaison officer that administers the FIRM’s “Minority Business Enterprise Program.” This official is charged with designing and implementing audit and reporting systems that will keep management informed on a monthly basis of the status of the equal opportunity area.

Supervisors have been made to understand that their work performance is being evaluated on the basis of their equal opportunity efforts and results, as well as other criteria. It shall be the responsibility of the FIRM and its supervisors to take actions to prevent harassment of employees placed through affirmative action efforts.

B) Reports: Unless exempted by law and regulation, the FIRM shall make available and file those reports related to equal opportunity as may be required by the City of Duluth and State and Federal compliance agencies. Requirements and Reports are defined in 41CFR60 “Compliance Responsibility for Equal Opportunity” published by the U. S. Department of Labor which is incorporated herein by reference. Additional requirements are defined in various State and Federal Civil Rights Legislation and Rules promulgated thereunder.

C) Nonsegregated Facilities: The FIRM certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The FIRM certifies that it will not maintain or provide for its employees any segregated facilities at any of its establishments and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The FIRM agrees that a breach of this
certification is a violation of the Equal Opportunity Clause in this certificate. As used in this Certification, the term "segregated facilities" means any waiting rooms, work area, rest rooms and wash rooms, restaurants and other eating areas, time clocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation for entertainment area, transportation, and housing facilities provided for employees which are segregated by explicit directive or are, in fact, segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise.

D) Affirmative Action Compliance Program: Unless exempted by regulation and law, the FIRM—if the FIRM has 50 or more employees and if the value of current contracts with the City of Duluth exceeds $50,000—shall prepare and maintain a written affirmative action compliance program that meets the requirement as set forth in 41CFR60.

E) Non-Compliance: The FIRM certifies that it is not currently in receipt of any outstanding letters of deficiencies, show cause, probable cause, or other such notification of non-compliance with EEO Laws and Regulations.

F) Employment Goals - “Construction” Projects: It shall be the goal of the FIRM if the PROJECT is of a construction nature that in all on-site employment generated that no less than 3% of the on-site workforce will be minority employees and that no less than 7% of the on-site workforce will be female employees. Further, it is the goal of the FIRM if the PROJECT is of a construction nature that in all on-site employment generated that no less than 3% of the work hours generated shall be worked by minority employees and that no less than 7% of the work hours generated shall be worked by female employees.

G) Subcontractors: The FIRM will for all its PROJECT subcontractors regardless of tier (unless exempted by law and regulation) that received in excess of $2,500 require that: (1) the subcontractor shall execute an "EEO Statement and Certification" similar in nature to this "Statement and Certification", (2) said documentation to be maintained on file with the FIRM or subcontractor as may be appropriate.

RESPONSIBLE CONTRACTOR VERIFICATION AND CERTIFICATION OF COMPLIANCE

PROJECT TITLE: ____________________________________________

Minn. Stat. § 16C.285, Subd. 7. IMPLEMENTATION. ... any prime contractor or subcontractor that does not meet the minimum criteria in subdivision 3 or fails to verify that it meets those criteria is not a responsible contractor and is not eligible to be awarded a construction contract for the project or to perform work on the project...

Minn. Stat. § 16C.285, Subd. 3. RESPONSIBLE CONTRACTOR, MINIMUM CRITERIA. "Responsible contractor" means a contractor that conforms to the responsibility requirements in the solicitation document for its portion of the work on the project and verifies that it meets the following minimum criteria:

<table>
<thead>
<tr>
<th>(1)</th>
<th>The Contractor:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>(i) is in compliance with workers' compensation and unemployment insurance requirements;</td>
</tr>
<tr>
<td></td>
<td>(ii) is currently registered with the Department of Revenue and the Department of Employment and Economic Development if it has employees;</td>
</tr>
<tr>
<td></td>
<td>(iii) has a valid federal tax identification number or a valid Social Security number if an individual; and</td>
</tr>
<tr>
<td></td>
<td>(iv) has filed a certificate of authority to transact business in Minnesota with the Secretary of State if a foreign corporation or cooperative.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>(2)</th>
<th>The contractor or related entity is in compliance with and, during the three-year period before submitting the verification, has not violated section 177.24, 177.25, 177.41 to 177.44, 181.13, 181.14, or 181.722, and has not violated United States Code, title 29, sections 201 to 219, or United States Code, title 40, sections 3141 to 3148. For purposes of this clause, a violation occurs when a contractor or related entity:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>(i) repeatedly fails to pay statutorily required wages or penalties on one or more separate projects for a total underpayment of $25,000 or more within the three-year period;</td>
</tr>
<tr>
<td></td>
<td>(ii) has been issued an order to comply by the commissioner of Labor and Industry that has become final;</td>
</tr>
<tr>
<td></td>
<td>(iii) has been issued at least two determination letters within the three-year period by the Department of Transportation finding an underpayment by the contractor or related entity to its own employees;</td>
</tr>
<tr>
<td></td>
<td>(iv) has been found by the commissioner of Labor and Industry to have repeatedly or willfully violated any of the sections referenced in this clause pursuant to section 177.27;</td>
</tr>
<tr>
<td></td>
<td>(v) has been issued a ruling or findings of underpayment by the administrator of the Wage and Hour Division of the United States Department of Labor that have become final or have been upheld by an administrative law judge or the Administrative Review Board; or</td>
</tr>
<tr>
<td></td>
<td>(vi) has been found liable for underpayment of wages or penalties or misrepresenting a construction worker as an independent contractor in an action brought in a court having jurisdiction. Provided that, if the contractor or related entity contests a determination of underpayment by the Department of Transportation in a contested case proceeding, a violation does not occur until the contested case proceeding has concluded with a determination that the contractor or related entity underpaid wages or penalties.*</td>
</tr>
</tbody>
</table>

Rev. 11-13-2014
| (3)   | The contractor or related entity is in compliance with and, during the three-year period before submitting the verification, has not violated section 181.723 or chapter 326B. For purposes of this clause, a violation occurs when a contractor or related entity has been issued a final administrative or licensing order. *

(4)   | The contractor or related entity has not, more than twice during the three-year period before submitting the verification, had a certificate of compliance under section 363A.36 revoked or suspended based on the provisions of section 363A.36, with the revocation or suspension becoming final because it was upheld by the Office of Administrative Hearings or was not appealed to the office. *

(5)   | The contractor or related entity has not received a final determination assessing a monetary sanction from the Department of Administration or Transportation for failure to meet targeted group business, disadvantaged business enterprise, or veteran-owned business goals, due to a lack of good faith effort, more than once during the three-year period before submitting the verification. *

| * Any violations, suspensions, revocations, or sanctions, as defined in clauses (2) to (5), occurring prior to July 1, 2014, shall not be considered in determining whether a contractor or related entity meets the minimum criteria.

(6)   | The contractor or related entity is not currently suspended or debarred by the federal government or the state of Minnesota or any of its departments, commissions, agencies, or political subdivisions; and

(7)   | All subcontractors that the contractor intends to use to perform project work have verified to the contractor through a signed statement under oath by an owner or officer that they meet the minimum criteria listed in clauses (1) to (6).

---

Minn. Stat. § 16C.285, Subd. 5. **SUBCONTRACTOR VERIFICATION.**

A prime contractor or subcontractor shall include in its verification of compliance under subdivision 4 a list of all of its first-tier subcontractors that it intends to retain for work on the project.

If a prime contractor or any subcontractor retains additional subcontractors on the project after submitting its verification of compliance, the prime contractor or subcontractor shall obtain verifications of compliance from each additional subcontractor with which it has a direct contractual relationship and shall submit a supplemental verification confirming compliance with subdivision 3, clause (7), within 14 days of retaining the additional subcontractors.

A prime contractor shall submit to the contracting authority upon request copies of the signed verifications of compliance from all subcontractors of any tier pursuant to subdivision 3, clause (7). A prime contractor and subcontractors shall not be responsible for the false statements of any subcontractor with which they do not have a direct contractual relationship. A prime contractor and subcontractors shall be responsible for false statements by their first-tier subcontractors with which they have a direct contractual relationship only if they accept the verification of compliance with actual knowledge that it contains a false statement.
Minn. Stat. § 16C.285, Subd. 4. VERIFICATION OF COMPLIANCE.

A contractor responding to a solicitation document of a contracting authority shall submit to the contracting authority a signed statement under oath by an owner or officer verifying compliance with each of the minimum criteria in subdivision 3 at the time that it responds to the solicitation document.

A contracting authority may accept a sworn statement as sufficient to demonstrate that a contractor is a responsible contractor and shall not be held liable for awarding a contract in reasonable reliance on that statement. Failure to verify compliance with any one of the minimum criteria or a false statement under oath in a verification of compliance shall render the prime contractor or subcontractor that makes the false statement ineligible to be awarded a construction contract on the project for which the verification was submitted.

A false statement under oath verifying compliance with any of the minimum criteria may result in termination of a construction contract that has already been awarded to a prime contractor or subcontractor that submits a false statement. A contracting authority shall not be liable for declining to award a contract or terminating a contract based on a reasonable determination that the contractor failed to verify compliance with the minimum criteria or falsely stated that it meets the minimum criteria.

CERTIFICATION

By signing this document I certify that I am an owner or officer of the company, and I swear under oath that:

1) My company meets each of the Minimum Criteria to be a responsible contractor as defined herein and is in compliance with Minn. Stat. § 16C.285,

2) I have included Attachment A-1 with my company’s solicitation response, and

3) If my company is awarded a contract, I will also submit Attachment A-2 as required.
