

## What is RxCheckup?

A one-on-one visit with a pharmacist to manage your medicines. Together, you'll make sure they're safe, effective and fit your lifestyle. You'll leave knowing:

- You're taking the right medicines to achieve your best health
- How to avoid problems, like side effects and interactions
- Ways to make your medicine better fit your lifestyle
- Ideas to cut costs on prescriptions

**Be safe.  
Feel good.  
Save money.**

## BE SAFE.

When it comes to your medicines, it's surprising what can put your safety at risk. Our pharmacists make sure your medicines are safe to take with each other. And they'll help you understand the risks.

## FEEL GOOD.

Medicines can help you reach your best health. But, sometimes you might not like all the side effects. We'd like to help. When you're taking medicines that fit your body and lifestyle, you'll be in control of your health and feel your best.

## SAVE MONEY.

Our pharmacists may be able to help save you money by finding a generic option or working with your doctor to get you off a medicine. Their goal is to lower your out-of-pocket costs.

## Hand-in-hand with your doctor

You trust your doctors and your health care team. Your RxCheckup pharmacist knows that's important to you. As a part of that team, your pharmacist is focused on your medicines and understanding what's best for you. You'll get the attention you need to feel confident about your care.

"I really value the knowledge and skills of our RxCheckup pharmacist. She is particularly helpful when patients have problems or questions about their medicines. She can deal with their pharmacy benefits, lowering costs, medicine interactions and side effects. She also makes great suggestions for what to do when the usual medicines haven't worked."

**Dr. Ganga Reddy, MD, Chief Physician**  
HealthPartners West Clinic

## Flexible and at no cost to you

Improve your health and your wallet! Appointments are no cost as part of your health plan. Call from the comfort of your home or office. Or, meet with your pharmacist in-person.

**85 percent of participants said the program was "completely" worth their time.**
