Flusher Tank Retrofit – Units 3750 & 3751

Removal and disposal of old tank and sheet metal. Bid one or both options.

A. Install new 2000 gallon galvanized elliptical fully baffled tank and sub-frame, complete with full length mounting rails and rear enclosure, including all doors and rear bumper. Water tank to have cab and outside fill level indicator. Design to match original components as closely as possible.

Paint color – White – matching cab color. Bidder must list gauge size for all metal components.

B. List cost for new 2000 gallon stainless steel elliptical fully baffled tank and sub-frame, complete with full length mounting rails and rear enclosure, including all doors and rear bumper. Water tank to have cab and outside fill level indicator. Design to match original components as closely as possible.

No painting necessary. Bidder must list gauge size for all metal components.

Install to include all new wiring, new LED marker and tail lamps. Install new strobe light on rear of tank enclosure.

Reuse sub-frame for rear engine and pump only.

Vehicle does not have a dump valve.

Reuse existing valves, manifold, plumbing, water pump, diesel drive, control box, spray heads, spray bar, etc...

List optional work / supplies to be included in new tank and sheet metal installation – Prior approval required.
