**Addendum No. 2**  
**Solicitation 25-99767**  
**PROJECT**

This addendum serves to notify all bidders of the following changes to the solicitation documents:

1. The proposal due date has been moved to **Wednesday, November 19, 2025 by 3:00 PM.**

The following are changes to Addendum No. 1. The questions that were answered incorrectly/need more clarification will be shown below with the corrected answer.

7. Do you have a feel for the level of detail for the environmental review requirements?

- Environmental review will include completion of NHPA Section 106 review, development of a project description for US Fish and Wildlife Service review (Information for Planning and Consultation – IPaC submission), and answering questions pertaining to the potential effect of the proposed design on the environment. We have not been provided with a standard form or questionnaire. Assume there will be no need for an EAW due to the limited scope and scale of this project.

12. Will the consultant or the City be responsible for completing EPA grant progress reports?

- The City will be responsible for the EPA grant progress reporting.

19. Has NPS identified if this project fits within categorical exclusion for NEPA, such as items C.12 or C.17 (F.1)?

-This is EPA funded, not NPS. See updated response to question 7. It has not been pre-determined if the project is eligible for a categorical exclusion. However, the scope of work is likely to be eligible for a categorical exclusion. Assume there will be no need for an EAW due to the limited scope and scale of this project. We have not been provided with a standard form or questionnaire.

Please acknowledge receipt of this Addendum by checking the acknowledgement box within the [www.bidexpress.com](http://www.bidexpress.com) solicitation.
