Campus Connector Trail Project Update

[Duluth, MN] - The City of Duluth has been working to construct the Campus Connector Trail along College Street since early May. The new trail is a 10 foot multi-purpose non motorized trail connecting neighborhoods near Lowell Elementary School down to the Lakewalk Trail. Crews are working on final curb details next week with the City's streets maintenance team temporarily filling in areas impacted by potholes to improve drivability until paving can be done in mid July. Motorists should continue to use the detour route. Additional trail work and pavement striping will follow the street paving.

The City reminds motorists to slow down in work zones.
